Complimentary Reference Material

This PDF has been made available as a complimentary service for you to assist in evaluating this model for your testing requirements.

TMG offers a wide range of test equipment solutions, from renting short to long term, buying refurbished and purchasing new. Financing options, such as Financial Rental, and Leasing are also available on application.

TMG will assist if you are unsure whether this model will suit your requirements.

Call TMG if you need to organise repair and/or calibrate your unit.

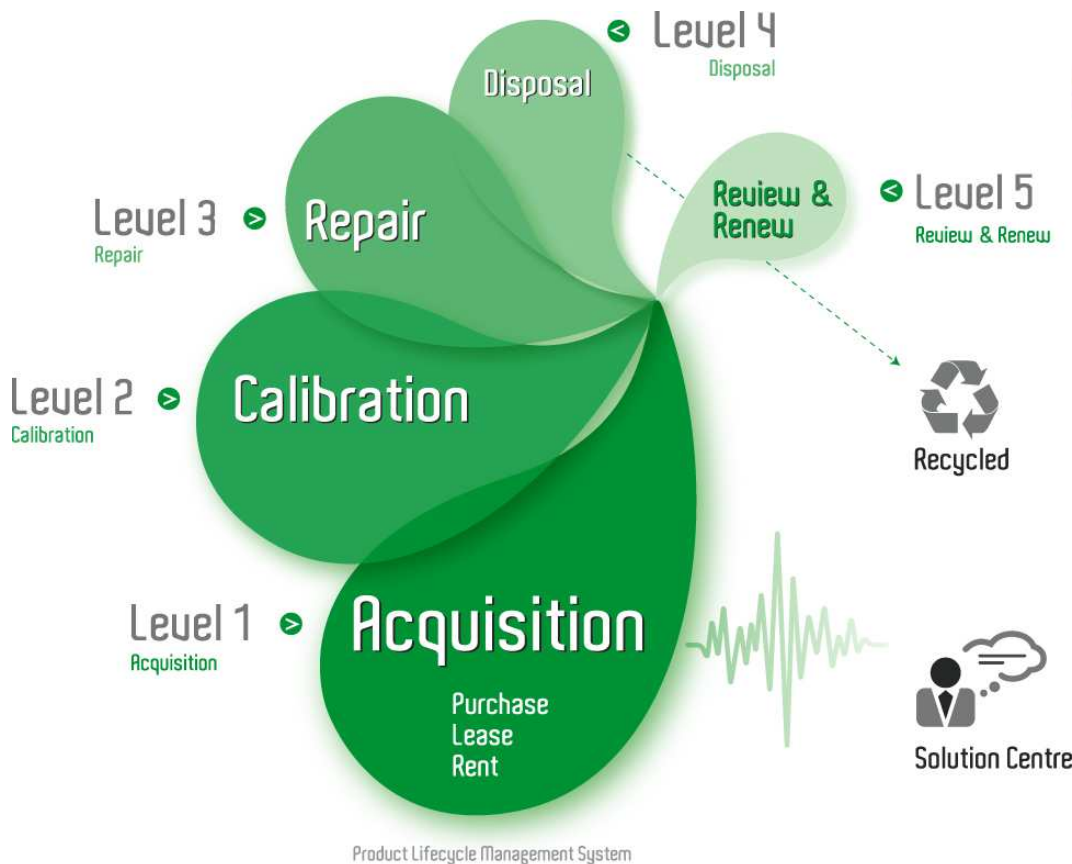

If you click on the "Click-to-Call" logo below, you can call us for FREE!

DTX CableAnalyzer™ significantly reduces your total time to certify.

The new DTX CableAnalyzer™ Series from Fluke Networks is the testing platform for today – and tomorrow. This revolutionary new platform significantly reduces total time to certify by improving every aspect of the testing process.

It all starts with a Cat 6 Autotest time that's three times faster than other testers – and fiber testing that's five times faster. But that's just the beginning. DTX also gives you Level IV Accuracy, unmatched troubleshooting diagnostics, 900 MHz of testing bandwidth, 12-hour battery life, and nearly instant setup and reporting.

With the DTX, you're ready for whatever the world throws at you – today and tomorrow.

DTX CableAnalyzer™
It's all about time.

900 MHz frequency for a future-proof investment

The top-of-the-line DTX CableAnalyzer – the DTX-1800 – supports testing up to 900 MHz. This extended bandwidth supports the ISO Class F links, as well as emerging standards like 10 Gigabit Ethernet over twisted-pair cabling. It also enables you to certify links for other applications, such as video distribution over twisted-pair cabling. No other tester on the market gives you this kind of future-proof investment while meeting current Cat 5e/6 specifications.

Accuracy every time, over time

The DTX Series testers are more accurate than any cable certification tester on the market today. Overall accuracy is a function of two critical factors: tester accuracy level – which assures that the tester delivers the correct PASS/FAIL results – and Permanent Link adapter technology, which is also a function of the quality and characteristics of the test adapters that interface to the link-under-test.

		Link meets spec	Link does not meet spec
Test Results	Pass	OK	"False" Pass How much does a call back cost?
	Fail	"False" Fail Unnecessary troubleshooting and re-testing time	OK

The cost of inaccuracy: A tester showing incorrect Pass/Fail decision may cause a good link to fail (false fail) or a bad link to pass (false pass). Both of these false results cost you time and money.

Tester accuracy exceeds Level IV

Until now, testers have been designed to meet accuracy Level III. The more demanding accuracy Level IV specification has been proposed in ISO/IEC (international standards) to test Class F links to 600 MHz. DTX testers exceed this new specification, assuring you of higher confidence in results over the full frequency range.

Permanent Link adapter technology eliminates false failures

Commercial patch cords – including Cat 5e/6 and Cat 7 – used in Permanent Link testing applications can cause costly false

failures by failing a good link and adding unnecessary hours of troubleshooting and repeat testing. The daily wear associated with coiling, uncoiling, and storing patch cords under rough field conditions causes invisible degradation over time and contributes to Return Loss, which is often the cause of a FAIL.

At Fluke Networks, we put accuracy first. That's why we developed high-performance Permanent Link Adapters instead of using commercial patch cords. Our proprietary technology ensures superior accuracy and stability required for measuring Return Loss, while increasing the accuracy of all other measured test parameters – **not just accuracy one time, but accuracy every time – over time.**

As you can see in this graph, a commercial Cat 7 SFTP cord has a 10 dB loss after 150 cycles of coiling and uncoiling. This 10 dB degradation causes a good link to fail – and you end up with a false fail. This 10 dB of loss won't occur when you use Fluke Networks' Permanent Link adapter technology – with DTX you get repeatable accuracy you can count on.

The DTX advantage: speed and accuracy.

The DTX CableAnalyzer's powerful features, speed, and superior accuracy make your crews more efficient and productive – and you can see the results on the bottom line. It's all about time – and no other tester delivers like DTX.

- **Increase productivity from day one.** Intuitive interface means your techs spend less time in training and more time testing.
- **Zero to certified in 9 seconds.** This unheard-of Cat 6 test speed lets you move from link to link three times faster than with previous testers.
- **Level IV Accuracy.** Get the most accurate test results in the shortest possible time.
- **900 MHz frequency range.** Prepares you for future applications, such as 10 Gigabit Ethernet, Class F and CATV.
- **Advanced time-saving diagnostics.** Pinpoints the location of a failure and is the only tester that suggests corrective action, saving troubleshooting time.
- **Record-fast fiber certification.** Certifies a pair of fibers in 12 seconds with DTX singlemode and multimode fiber modules.
- **12-hour battery life.** Gives you the power to complete any job.
- **Save time managing results.** From setup to reporting, LinkWare™ Cable Test Management Software's simple user interface and time-saving features increase productivity.

Significantly reduces total time to certify.

The DTX Digital CableAnalyzer Series gives you a complete solution that streamlines every aspect of the certification job – from setup, to record-fast testing and troubleshooting, to reporting results to the customer. All told, DTX can save you considerable time and money – up to four hours a day.

Cat 6 certification in 9 seconds

The DTX-1200 and DTX-1800 perform Cat 6 certification tests in just 9 seconds – in full compliance with industry standards and with superior accuracy. That's *three times faster* than existing testers. This incredible speed means you can test up to 170 more links in an eight-hour shift.

Troubleshoot faults twice as fast

When a link fails, the DTX Series provides quick, easy-to-understand directions to identify the point of failure (distance from the tester) and the possible reason(s) for the failure.

These directions not only tell you the problem, but also *identify corrective actions* your test technicians can take to solve the problem quickly – all without having to consult the project manager. Instead of spending time executing trial and error corrections – and re-testing to find out

whether the problem has been resolved – the technician knows exactly where to look and what to do to fix the failing link. *Even if only two percent of the cables certified in one shift fail Autotest, you'll save as much as two hours of labor time per day of certifying.*

Fast even when you're not testing

The DTX Series isn't just a faster way to test. It cuts setup and reporting times. Its ease-of-use lowers training time. Extended battery life means you can do more on a single charge. And a bright color display, ample memory, and built-in talk set all contribute to overall productivity while enhancing the user experience. **This all adds up to save you time and money every day.**

The DTX CableAnalyzer: a visionary approach to testing.

Level IV Accuracy –

Exceeds spec requirements for Cat 6 and beyond.

Fiber ready at all times –

optional fiber modules fit snug and protected in DTX module cavity.

Advanced time-saving diagnostics

pinpoint problems anywhere on the link and suggest corrective action to help you get the job done on time.

Field tough Permanent Link Adapter

delivers repeatable accuracy and Cat 6 interoperability.

12-hour battery life –

Lithium ion battery provides full day of testing.

Internal memory stores up to 250 graphical Cat 6 test results or up to 2000 reports in text format.

Memory Card for instant

data hand-off – each multiple of 32 MB stores 600 Cat 6 graphical link test results.

Talk feature saves time by allowing you to communicate with your test partner at the other end of the link over both copper and fiber.

Rugged overmold bonded to case stands up to tough field conditions.

Bandwidth support to 900 MHz – supports video distribution, Class F, and 10 Gigabit Ethernet.

9-second Cat 6 Autotest – speeds you through testing three times faster than any other tester.

Large color display with bright backlight for easy viewing.

12-second fiber Autotest – performs dual fiber, dual-wavelength certification test.

Save full graphical test results to Fluke Networks' LinkWare PC software.

USB Port for high-speed test data downloads.

Portable, lightweight ergonomic design for easy field use.

Rotary knob makes learning easy and operation simple – you always know what test mode is selected.

Now you can test Gigabit Ethernet fiber links with the new DTX Gigabit Multimode Fiber Adapter.

New DTX Patch Cord Test Adapters - a fast, simple way to ensure patch cords meet the performance requirements of the installed link.

Extend the capabilities of your DTX CableAnalyzer to test coaxial cabling systems with the new DTX Coax Test Adapters.

Get more done in less time with fiber on-board.

Record-fast fiber certification

The DTX fiber modules accelerate testing through exclusive technology and an easy-to-use interface. Press the Autotest button and you get standards compliant certification automatically – test two fibers, each at two wavelengths, measure length, and determine the pass or fail status – all in about 12 seconds. Our fiber modules let you test more fibers in less time, cutting testing costs and freeing you up for other tasks. You can easily save more than 100 hours per year.

Unlike competitive fiber adapters which measure length and **two** loss measurements per Autotest, DTX is the only fiber test solution that measures length and **four** loss measurements per Autotest – all in about 12 seconds. With DTX Fiber Modules you can speed through fiber testing five times faster than the competition.

Test copper and fiber with a touch of a button

Only the DTX platform offers optional on-board fiber modules – so you'll never lose time searching for your fiber adapter. And fiber certification is always ready when you are. No other solution lets you switch between copper and fiber with a touch of a button.

Certify multimode and singlemode fiber

DTX fiber modules use LED and laser sources to ensure standards-compliant certification. Save, upload, manage, and print comprehensive certification reports using LinkWare PC software.

Deliver complete Tier 1 certification

Our comprehensive Tier 1 certification solution includes loss, length, and polarity measurements. You can validate fiber link performance and installation quality. Measure optical loss at multiple wavelengths. Measure fiber length and verify polarity. And bi-directionally test fibers at two wavelengths without swapping near and far-end units.

Find faults faster

An integrated on-module visual fault locator (VFL) makes troubleshooting simple link problems fast and incredibly easy. The bright laser-driven VFL helps you locate many near-end fiber faults and can be used to verify continuity and polarity. Our exclusive integrated design ensures that the VFL is always on-hand when you need it.

DTX copper/fiber kits available

If you certify twisted pair copper and fiber optic cabling, we have a kit for you. These kits bundle a DTX Cable Analyzer set with DTX Fiber Modules so you have what you need to certify both copper and fiber media.

Time is money. DTX saves you both.

The DTX CableAnalyzer Series delivers superior performance that can reduce your total certification costs by as much as 33% per year. This dramatic reduction is the result of not just faster testing, but also improved accuracy, superior diagnostics, longer battery life, simple user interface, and fast setup and reporting.

DTX – it's all about time.

DTX CableAnalyzer Series

Product Features	DTX-1800	DTX-1200	DTX-LT
Cat 6 Autotest time (seconds)	9	9	30
Maximum bandwidth (MHz)	900	350	350
Accuracy level	IV	IV	IV
Color display	•	•	•
Stores graphical results data	•	•	•
Internal memory capacity (graphical Cat 6)	250	250	250
Removable memory card interface			
Cat 6 graphical results for each of 32 MB multiple	600	600	n/a
Lithium ion batteries – battery life	12 hours	12 hours	12 hours
Advanced diagnostics	•	•	•
USB interface	•	•	•

Note:

- Feature or accessory is available in the standard product configuration.
- n/a The feature is not available; the accessory is not applicable.
- option The accessory can be purchased as an optional item.

The DTX Series future-proofs your investment giving you a clear and simple upgrade path from any of the models to any higher performance model, including the DTX-1800.

Enhance your DTX tester with service, support, and training.

Register your DTX and receive a bonus gift. Plus access to our Technical Assistance Center (TAC) and extensive on-line Knowledge Base for fast answers. Register today at www.flukenetworks.com/register

Customer Support is easy with our NetworkSuperVision™ Gold Support. It ensures peace-of-mind with free annual calibration, free loaner units, 24/7 TAC support and special discounts on training and promotions. See www.flukenetworks.com/goldsupport for more information. Or contact your country sales organization for Gold program availability and pricing.

Train your installers at our one-day CCTT training and certification program. This BICSI-accredited course includes classroom training, hands-on labs, and exam certification exercises. Visit www.flukentetworks.com/CCTT for more information. Or contact the country sales organization nearest you for availability.

Experience the power of DTX.

We invite you to experience the unique capabilities of our DTX CableAnalyzer by taking a virtual test drive at www.flukenetworks.com/DTXlive.

Or in the U.S. and Canada, call us at **1-800-508-0490** and let a Fluke Networks Systems Engineer show you how DTX technology can work for you. Other countries, visit www.flukenetworks.com/contact for a sales organization near you. You can also sign up for a free half-day workshop covering the latest in testing and standards overview, DTX product demonstration, and hands-on operation.

To find a workshop in your area, go to www.flukenetworks.com/workshops.

The DTX Series from Fluke Networks. The revolutionary platform that significantly reduces total time to certify – today and tomorrow.
